

Trident Space & Defense to showcase Rugged SSDs for Military and Defense Applications Featuring Fast Erase and Secure Erase for SSD Sanitization.

Torrance, CA, June 1, 2009: [Trident Space & Defense](#), (formerly a division of TRW) will be exhibiting its Triton Series of ruggedized [Solid State Drives](#) (SSDs) at the Military & Aerospace Electronics Forum at the San Diego Convention Center. **Trident's Rugged Solid State Drives will be displayed at Booth #500.**

Rugged Solid State Drive Storage with High Performance, Speed and Protection for Today's Data-Intensive Applications to be Featured

[Trident Space & Defense](#), a recognized industry leader of high reliability microelectronic products and services for the Aerospace, Military and Industrial markets will be exhibiting their ruggedized and military grade SSDs. Trident is proud to present their **Triton FSE Solid State Drive (SSD)** that is purpose built for ultra rugged military and defense applications where data integrity and security is an utmost concern. Beyond its rugged storage design, the Triton FSE SSD has the ability to quickly clear and purge your data and sanitize your information with agency defined algorithms allowing for complete media de-classification.

The [Triton Series of Solid State Drives](#) incorporates industrial grade SLC NAND Flash in a ruggedized enclosure. [Triton SSDs](#) are offered in standard 2.5 inch PATA or SATA form factor, making them ideal as direct drop-in replacements for conventional rotating hard disks that often fail in harsh environments with extreme temperatures, shock, vibration, dust, and moisture.

Triton SSD FEATURES

- Ruggedized design that is resistant to shock, vibration and temperature extremes.
- Precision machined aluminum alloy case, anodized inside and out for improved corrosion resistance and durability
- High Performance (up to 100MB/sec) and High Capacity (up to 128GB)
- Fast erase, as well as Secure Erase algorithms to quickly clear or declassify data
- Rugged storage with Industrial Grade SLC NAND Flash

Trident Space & Defense is a Veteran-Owned, Small Business Company. It is an ISO9001:2000 certified and Department of State registered manufacturer. Originally established in 1976 as part of TRW, Trident is well positioned to build on a proven legacy of 30 successful years in supporting over 100 major Space, Military and high reliability Industrial programs.
