

Trident Space & Defense Exhibits Ruggedized Solid State Drives at RTECC in Long Beach, CA.

Torrance, CA, October 23, 2008: [Trident Space & Defense](#), (formerly a TRW company) will be exhibiting its Triton Series of ruggedized [Solid State Drives](#) (SSDs) at the Real Time & Embedded Computing Conference in Long Beach, CA. Trident will also debut it's new line of Industrial Grade small form factor 1.8" SSD's.

Rugged Solid State Drive (SSD) Data Storage with High Performance, Speed and Protection for Today's Data-Intensive Applications

Trident Space & Defense, a recognized industry leader and global supplier of high reliability microelectronic products and services for the Aerospace, Military and Industrial markets will be exhibiting its Solid State Drive Line.

The Triton Series of Solid State Drives incorporates SLC Flash memory in a completely solid-state design. Triton SSDs are offered in standard 2.5 inch PATA/IDE or SATA form factor. Making them ideal as direct drop-in replacements for conventional rotating hard disks that often fail in harsh environments where temperature fluctuations, shock, vibration, dust, moisture, and/or magnetic fields are present.

Trident is also proud to debut its new line of high performance industrial grade 1.8" drives, which are available in IDE or SATA interfaces. Tridents Industrial SSDs are perfect for rugged mobile solutions, as well as for embedded computing.

Trident Series SSD Features

- Ruggedized design that is both Shock Resistant and Splash Proof
- Precision machined aluminum alloy case, anodized inside and out for improved corrosion resistance and durability (2.5" drives).
- PATA/IDE: Up to 64GB Capacity in standard 2.5" form factor (9.4mm height). R/W speeds up to 48/40MB/s.
- SATA: Up to 64GB Capacity in standard 2.5" form factor (9.4mm height). R/W speeds up to 130/70MB/s.
- 1.8" Drives available in capacities up to 32GB.
- No Device Driver Required
- Operating System Independent

Trident Space & Defense is a Veteran-Owned, Small Business Company. It is an ISO9001:2000 certified and Department of State registered manufacturer. Originally established in 1976 as part of TRW, Trident is well positioned to build on a proven legacy of 30 successful years in supporting over 100 major Space, Military and high reliability Industrial programs.
