

# TRITON SERIES 2.5 INCH SOLID STATE DRIVES

## TRITON

Trident's most rugged solid state drive for no-compromise environments. The Triton SSD offers protection for the most extreme environmental situations with options for fully sealed and encapsulated drives. **(Available Immediately)**

**Interface:** IDE or SATA    **Capacities:** 8 (IDE only), 16, 32, 64GB    **Temp:** -40 to 85°C°

## TRITON F1

Blazing fast performance for controlled environmental conditions with sustained read and write speeds in excess of 100 MB/sec and over 3,000 IOPS. The Triton F1 is perfect for industrial applications that require high random as well as sequential throughput **(Available Q3 2009)**

**Interface:** SATA    **Capacities:** 32, 64, 128GB    **Temp:** -40 to 85°C°

## TRITON FX

Ultimate combination of high speed performance with the extreme durability that you've come to expect from Trident. With one of the highest storage capacities available in an SSD, the Triton FX pushes the technology envelope to offer up to 128GB of pure solid state storage. Perfect for use in military and defense applications where harsh environments, shock, vibration, temperature and other extremes are a concern. **(Available Q2 2009)**

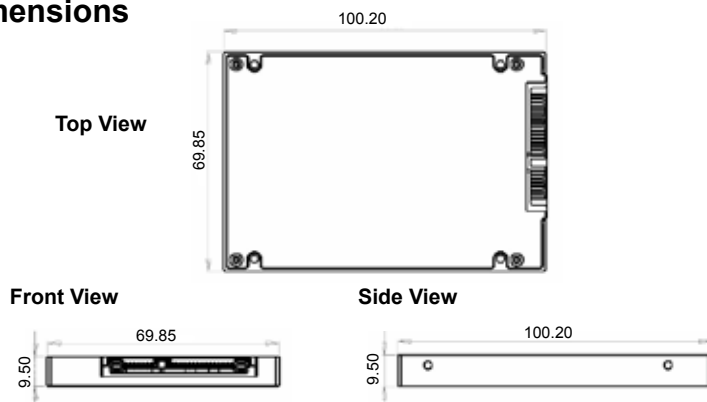

**Interface:** IDE or SATA    **Capacities:** 32, 64, 128GB    **Temp:** -40 to 85°C°

## TRITON FSE FEATURING FAST & SECURE ERASE

**Fast and Secure Erase!** Do you need to purge your data in a hurry? Triton FSE SSD is purpose built for the military and is the ultimate in data security. Extremely rugged, with high performance, the Triton FSE is our newest generation of SSD with the capability to purge and de-classify your data. **(Available Q2 2009)**

**Interface:** IDE or SATA    **Capacities:** 32, 64, 128GB    **Temp:** -40 to 85°C°
